Safety light curtains

Overview

ONE SIMPLE PRODUCT RANGE TO COVER MOST OF TODAY'S INDUSTRIAL APPLICATIONS

Safety light curtain (SLC) product range is compact with competitive performance and innovative features. Includes models with integrated safety functions, including self-monitoring of static outputs, control of external contactors (EDM) and selectable automatic/manual restart. 2 safety PNP static outputs. Easy connection and installation thanks to the M12 connectors and the use of unshielded cables.

RELIABLE AND COMPACT

High ingress protection ratings

IP67 and IP65 offer high protection against dirt, dust, sand, water, projections and other liquids with IP67 and IP65 ratings. High resistance to infiltration by dust and liquids in a highly compact light curtain.

Compact size

SLC is one of the smallest light curtains on the market (with all integrated safety functions).

With a minimal cross section:
28 x 30 mm.

Robustness

Thanks to powder-coated aluminum casing SLC range can obtain high level of reliability. Excellent also in cold storage facilities with -30°C to +55°C operating temperature.

SAFE AND SMART

No blind area

Thanks to the position of the 1st beam on the connector side, the protected area extends until the light curtain end maintaining the resolution.

Fast, simple installation

Plug and play thanks to the M12 connectors and the use of unshielded cables. No programming necessary. Easy to install and replace.

User-friendly diagnostics via LEDs

Status indicating display with alignment aids are helping the user to diagnose the status.

HIGH LEVEL OF PRODUCTIVITY AND SAFETY

High safety

Type 2 and Type 4 light curtains approved in accordance with:

- EN IEC 61496-1/-2
- ANSI / UL 1998

Finger, hand and body protection

From safety light barriers for body protection to the safety light curtain for finger protection and hand protection, the product series SLC4 and SLC2 cover the large portfolio.

A range adapted to your needs

Integrated safety functions, including self-monitoring of static outputs, control of external contactors (EDM) and selectable automatic/manual restart, helps for increased productivity due to reduced downtimes.

Safety light curtains

Features

SLC4 – SLC2 Range

Noteworthy features and a comprehensive range

SLC range is a compact light curtain range with competitive performance and innovative features. Includes models with integrated safety functions, including self-monitoring of static outputs, control of external contactors (EDM) and selectable automatic/manual restart. 2 safety PNP static outputs. Easy connection and installation thanks to the M12 connectors and the use of unshielded cables up to 100 m.

Safety light curtains

Main Features

SLC4 – SLC2 Range

Noteworthy features and a comprehensive range

MAIN FEATURES

- **Minimal cross section:** 28 x 30 mm
- **Start-up time:** ≤ 2 sec
- **No blind area on one side**
The position of first beam helps ensure that the sensitive area extends to end of the light curtain.
The protected area extends until the light curtain end, maintaining the resolution.

STANDARDS

-30 to +55°C operating temperature for all models with operating range up to 12 m.

-20 to +55°C operating temperature for H models (operating range up to 20 m) and 14 mm resolution models.

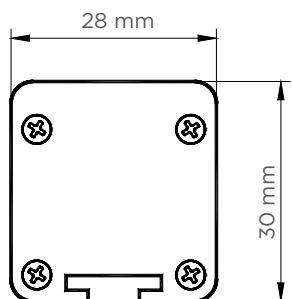

IP65 and IP67 protection rate.

Special versions resistant to vibrations and shocks.

DIMENSIONS (mm)

SAFETY PARAMETERS FOR TYPE 2 LIGHT CURTAINS

With the publication of Edition 3 of the harmonized EN 61496-1 standard it is no longer possible to use a Type 2 safety light curtains for safety functions assessed as SIL 2 / PL d.

If a safety level of SIL 2 / PL d (or higher) is required and it is nevertheless intended to use a safety light curtain, then it will be necessary to use a Type 4 safety light curtain. This regulatory requirement derives from the fact that the reduction of risk that can be obtained via a photoelectric safety light curtain is not only a function of the safety level of its electronic parts, but is also determined by its systematic capabilities (for example: environmental influences, EMC, optical performance and detection principle).

The systematic capability of a Type 2 photoelectric light curtain may in fact not be sufficient to help ensure adequate risk reduction for SIL 2 / PL d applications.

The standard also establishes that the labelling of Type 2 safety light curtains must indicate such limitation to SIL 1 / PL c. The PFHd values declared for the electronic control part of the device, on the other hand, are not limited and therefore it is possible to use the PFHd value provided by the manufacturer of the device in the global assessment of the safety function, even if it exceeds the SIL 1 / PL c range.

Safety light curtains

Safety light curtains

SLC4 Range

SLC4 Range with built-in control functions

FEATURES

- Selectable manual/automatic Start/Restart.
- Resolution: 14, 20, 30, 40, 50, 90 mm
- Access control: 2, 3, 4 beams
- Safety outputs: 2
- Selectable operating range: 0 to 4 m - low range/0 to 12 m
 - high range 14 mm resolution models: 0 to 3 m
 - low range / 1 to 6 m - high range
- Integrated feedback input for external device monitoring (EDM)
- Electrical connections and setting adjustments through M12 5-pole connector for emitter, M12 8-pole connector for receiver
- Unshielded cables up to 100 meters long can be used to connect the light curtain.
- Protected heights: 160 mm to 2260 mm

Safety light curtains

Compatible interfaces

SRS4-2NO

Type 4 interface for OSSD output devices

FEATURES

Safety interface module for safety light curtains SLC4 and SLC2.

- Guided-contact safety relays
- Start/Restart interlock
- EDM feedback input for extra external contactors monitoring

SAFETY LEVEL

TYPE 4

SILCL 3 | PL e - Cat. 4

ORDERING INFORMATION

Description	Type	Part Number	Pkg
TYPE 4 INTERFACE FOR OSSD OUTPUT DEVICES	SRS4- 2NO	2447935-1	1

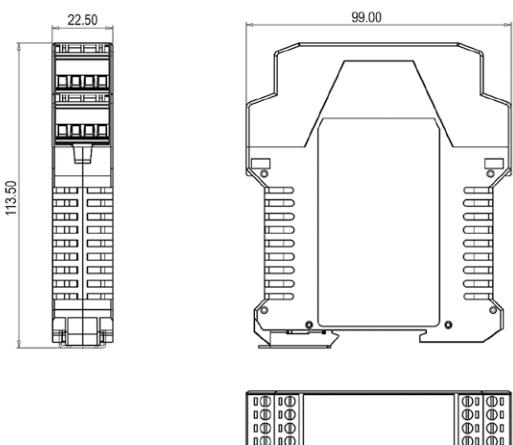

MAIN TECHNICAL DATA

Safety relay outputs	2 NO - 6 A 250 VAC
Status output	PNP - 100 mA at 24 VDC
Response time (ms)	≤ 20
Start/Restart command according to IEC 61496-1	Automatic/Manual monitored selectable
Status display	LEDs indication of power on, connected light curtains status and fault diagnosis
Power supply (VDC)	24 ± 20%
Electrical connections	On terminal blocks
Operating temperature (°C)	-30°C to +55°C
Protection rating	IP20 for housing IP2X for terminal blocks
Fastening	DIN rail fastening according to EN 50022-35 standard
Dimensions h x w x d (mm)	99 x 22,5 x 114

Safety light curtains

Compatible interfaces

SRS4M-2NO

Type 4 safety interface with muting

FEATURES

Safety interface module for safety light curtains SLC4 and SLC2 with integrated muting function.

- 2 inputs for muting sensors
- Inputs for the connection of one safety light curtain with failure reduced outputs
- Guided contact safety relays
- Start/Restart interlock
- EDM feedback input for extra external contactors monitoring
- Muting time-out selectable
- Integrated override with 2 operating modes selectable
- Muting enable input

SLC-FMC/ SLC-FMC-CG11

Floor support columns for light curtains

FEATURES

- Support columns for SLC safety light curtains, designed to provide more secure fastening to the floor, fast installation, and a simple and precise adjustment of the optical alignment of the system.
- Columns made by aluminium extrusion poles, with adjustable angular orientation. Easy assembling and disassembling of the light curtain with easy adjustment of the first beam's height.
- Built-in spirit level for a correct positioning of the vertical axis.
- Steel base with springs for a highly reliable adjustment of the column vertical axis.
- Steel foundation inserts included with the product.
- SLC-FM...CG11... models for light curtains complete with PG11 rear union for light curtain cable sheath

SLC-FMC2-DM/SLC-FMC2-ADM Columns with deflecting mirror

FEATURES

- Support columns with deflecting mirrors, designed to provide more secure fastening to the floor, fast installation, and a simple and precise adjustment of the optical alignment of the system.
- SLC-FMC2-DM models with pre-assembled deflecting mirrors, allow perimeter protections of up to 4 sides.
- SLC-FMC2-ADM models with pre-installed independent adjustable deflecting mirrors for safety light grids with 2, 3 and 4 beams. For applications with multiple sides and/or with a large protected perimeter the use of these models is recommended
- Optical power reduction factor: 15% for each mirror.
- Special models equipped with mirror with protective anti-fragmentation film available on request.

Safety light curtains

Mirrors

SLC-SLC-MP Deflecting mirror

FEATURES

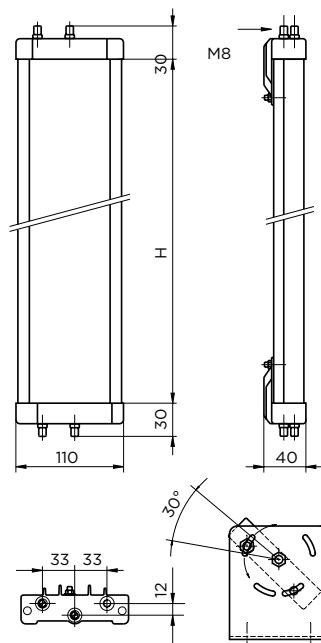

- The SLC-SLC-MP deflecting mirrors allow to create perimeter protection of areas with access points on multiple sides, with a considerable reduction of costs.
- This solution significantly reduces the need to use multiple safety light curtains allowing perimeter protection of up to 4 sides.
- Section bar: extruded aluminium
- Mirror pre-fitted with heights: 250 to 1900 mm
- Angular orientation: adjustable using supplied brackets
- Optical power reduction factor: 15% (for each mirror)

1900	1810	-		SLC-SLC-MP-181	1-2447917-4	1

DIMENSIONS (mm)

The following rules should be taken into consideration when using deflecting mirrors:

- Total working distance (range) given by the sum of the lengths of all sides giving access to the protected area
- Each mirror used will decrease the maximum working range between the Emitter and the Receiver by 15%
- In order to help ensure compliance mirrors must be placed at the minimum safety distance on each side from the danger zone
- The use of the SLC laser alignment device is recommended for a quick and reliable alignment of the system especially when using longer range light curtains or grids

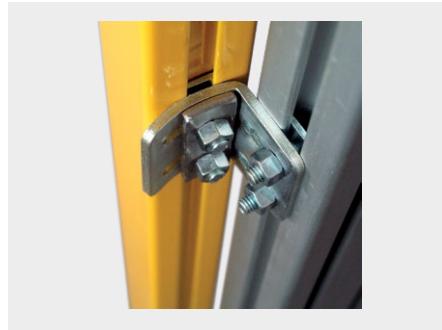

Safety light curtains

Brackets

SLC-B4 / SLC-B6 - Swivel brackets

FEATURES

- The SLC-B4 / SLC-B6 swivel brackets allow the rotation of the light curtain around its longitudinal axis, as well as the adjustment of its vertical and horizontal position.
- The use of the SLC-B4 / SLC-B6 swivel brackets is recommended to align those light curtains which are employed in applications having a long range or using deflecting mirrors.

ORDERING INFORMATION

Description	Type	Part Number	Pkg
Set of 4 swivel brackets for SLCs with length \leq 1200 mm	SLC-B4	2447914-1	1
Set of 6 swivel brackets for SLC with length \geq 1200 mm	SLC-B6	2447914-2	1

* One set must be ordered for each pair of light curtain (emitter + receiver)

SLC-B4-180 - 180° swivel brackets

FEATURES

- The SLC-B4-180 swivel brackets allow the 180° rotation of the light curtain around its longitudinal axis, as well as the adjustment of its vertical and horizontal position.
- The use of the SLC-B4-180 swivel brackets is recommended to align those light curtains which are employed in applications having a long range or using deflecting mirrors.

ORDERING INFORMATION

Description	Type	Part Number	Pkg
Set of 4 180° swivel brackets for SLC	SLC-B4-180	2447914-3	1

* One set must be ordered for each pair of light curtain (emitter + receiver)

SLC-BFLAT4 - Flat brackets

FEATURES

- The SLC-BFLAT4 brackets, with a thickness of only 4 mm, allow proper fastening of SLC light curtains.

ORDERING INFORMATION

Description	Type	Part Number	Pkg
Set of 4 flat brackets for SLC	SLC-BFLAT4	2447914-7	1

* One set must be ordered for each pair of light curtain (emitter + receiver)

SLC-BF - Fast coupling brackets

FEATURES

- The SLC-BF 4 brackets, with a thickness of only 4 mm, allow proper fastening of SLC light curtains.

Description	Type	Part Number	Pkg
Set of 2 fast-coupling brackets	SLC-BF2	2447914-4	1
Set of 4 fast-coupling brackets	SLC-BFAST4	2447914-5	1

* One set must be ordered for each pair of light curtain (emitter + receiver)

Safety light curtains

Other accessories

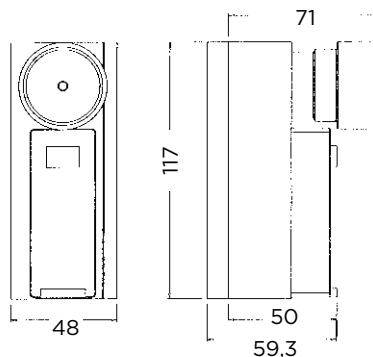

SLC-LASER - Laser alignment device

FEATURES

- SLC-LASER laser alignment device allows a fast and reliable optical alignment of safety light curtains; also compatible with the use of the SLC-MB floor mounting columns
- SLC-LASER devices emit a laser beam with visible red light with useful range up to 100 m
- The use is recommended for aligning light curtains that operate over long distances or multiple sides with the use of deflecting mirrors
- Light source: laser diode – wavelength 650 nm
- Class light source II – EN 60825-1
- Range (m): 100
- Beam divergence (mrd) < 0.5
- Max. power (mW): 1
- Power supply (VDC): 3 (2 AAA batteries)
- Fastening quick fastening to the light curtains
- Dimensions h x w x d (mm): 117 x 48 x 80

DIMENSIONS (mm)

ORDERING INFORMATION

Description	Type	Part Number	Pkg
Laser alignment device	SLC-LASER	2447921-1	1

SLC-VD4 / SLC-VD8 / SAV 12 - Vibration dampers

FEATURES

- The SLC-VD vibration dampers have been designed to significantly reduce mechanical damage to the light curtains installed in those applications with a high level of vibrations.
- The unprotected light curtains might feel the vibrations produced by e.g. presses, weaving machines, etc.

ORDERING INFORMATION

Description	For light curtains with protected height (mm) / beams	Type	Part Number	Pkg
Set of 4 vibration dampers	160	SLC-VD4	2447922-1	1
Set of 8 vibration dampers	310 to 1050	SLC-VD8	2447922-2	1
Set of 12 vibration dampers	1210 to 1810/2, 3, 4	SLC-VD12	2447922-3	1

*One set must be ordered for each pair of light curtain (emitter + receiver)

Safety light curtains

Other accessories

SLCPS-F/SLC-PS - Protective screens

FEATURES

- SLC-PS is a polycarbonate protective screen that helps ensure the light curtain's front screen from damages due to welding sparks or due to the presence of acids in the workspace.
- Protective screens can be quickly replaced thanks to the fast and easy stainless steel clamping system.

ORDERING INFORMATION

Light curtain length (mm)	Description	Type	Part Number	Pkg
150	4 protective screen (2 as spare parts)	SLC-PS-015	2447920-2	1
300		SLC-PS-030	2447920-3	1
450		SLC-PS-045	2447920-4	1
600		SLC-PS-060	2447920-5	1
750		SLC-PS-075	2447920-6	1
900		SLC-PS-090	2447920-7	1
1050		SLC-PS-105	2447920-8	1
1200		SLC-PS-120	2447920-9	1
1350		SLC-PS-135	1-2447920-0	1
1500		SLC-PS-150	1-2447920-1	1
1650		SLC-PS-165	1-2447920-2	1
1800		SLC-PS-180	1-2447920-3	1
2 beams		SLC-PS-2B	1-2447920-4	1
3 beams		SLC-PS-3B	1-2447920-5	1
4 beams		SLC-PS-4B	1-2447920-6	1
	1 set of stainless steel clamps for one safety light curtain (emitter and receiver)	SLC-PS-F	2447920-1	1

*For each pairs of safety light curtain (emitter and receiver) it is necessary to order both codes.

SLC-TR - Test rods

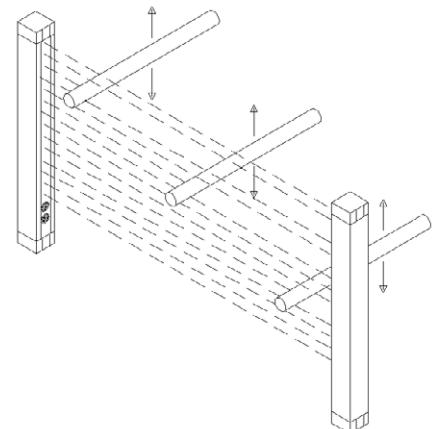

FEATURES

- The test rod is an opaque cylinder used after the installation of a safety light curtain to verify that no beams are bypassed due to the presence of reflecting surfaces.
- The test is carried out by slowly moving the test rod (\varnothing = resolution) in the centre and then along each side of the protected area. During this procedure the green led on the receiver must always remain in the off state.

ORDERING INFORMATION

Diameter	Type	Part Number	Pkg
\varnothing 14 mm	SLC-TR 14	2447919-1	1
\varnothing 20 mm	SLC-TR 20	2447919-2	1
\varnothing 30 mm	SLC-TR 30	2447919-3	1
\varnothing 40 mm	SLC-TR 40	2447919-4	1
\varnothing 50 mm	SLC-TR 50	2447919-5	1

BASICS ON SAFETY

EVERY CONNECTION COUNTS

WHAT IS SAFETY?

Machinery Safety

Machinery safety is the basis for secure cooperation between human and machine. The use of secure automation helps **protect staff** from the **hazards** that emanate **from plant and machinery**, enables smooth operation and helps increase production quality.

Machinery safety refers to the practices, measures, and standards put in place to help ensure the well-being of individuals interacting with machines.

WHAT IS SAFETY?

Safety

Active protective measures are usually implemented by **selecting** and **combining** in an appropriate way hardware components (such as sensors, switches, logic units, relays etc.) to build up a **Safety Related Control System**

A control system that executes an **active protective measure** is said to carry out a **safety function** and the control system itself is called **Safety Related Control System**.

Safety function		Example of application
Safety-related stop function initiated by a safeguard		Stop a motor in response to tripping of a protective device
Manual reset function		Intended action to re-establishes the safeguard after its actuation. Acknowledgement that risk is no more present
Start/restart function		Start of a dangerous movement can take place only when an hazardous situation no more exists
Muting function		Automatic temporary suspension of a safety function
Hold-to-run function		Hazardous machine movements can be controlled from a position within the hazard zone, e.g., inching mode during setup
Prevention of unexpected start-up		Keeping a machine in a stopped condition while persons are present in danger zones
Operating mode selection		Activation of safety functions by an operating mode selector switch
Safe motion, safe position		Overspeed, overtravel control

WHAT IS SAFETY?

Main standards Europe

Fundamental product European directives :

2006/42/EC: "Machine Directive" → for machine manufacturers

2014/30/EU: "Electromagnetic Compatibility Directive" → applies to electrical & electronic devices

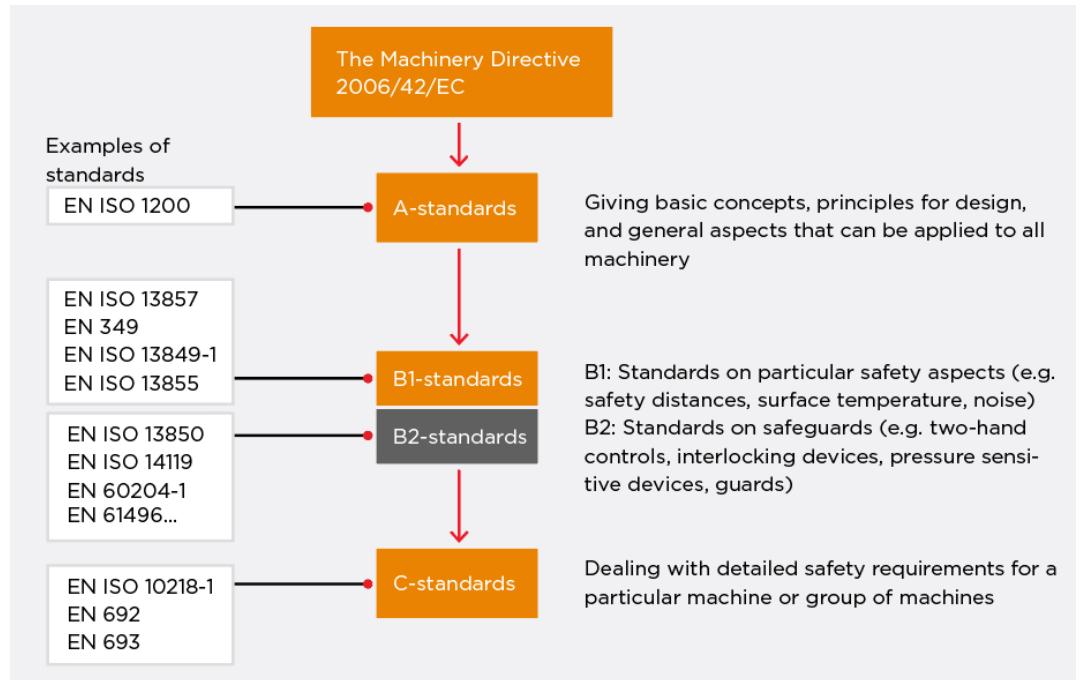

2014/35/EU: "Low Voltage Directive" → Applies to electrical equipment from 50 V to 1500 V

Umbrella machinery safety standards

ISO 13849 "Safety of machinery"

IEC 61508 "Functional safety of electrical / electronic / programmable electronic safety related systems" which impacts safety of machinery especially through
IEC 62061 "Safety of machinery - Functional safety of safety-related electrical, electronic and programmable electronic control systems"

IEC61496 "Safety of machinery – Electro-sensitive protective equipment"

Main standards North America

Health & Safety is governed by OSHA (Occupational Health and Safety Administration)

ANSI (American National Standard Institute) issue standards on the safety of machine tools and construction

Underwriters Laboratories Inc (UL) or CSA are the bodies that **issue certifications** for safety equipment

A type C Standard takes priority over type A and B Standards

WHAT IS SAFETY?

Safety levels

SAFETY LEVEL

TYPE 4

SIL 3 - SILCL 3 | PL e - Cat. 4

TYPE 2

SIL 1 - SILCL 1 | PL c - Cat. 2

SIL (Safety Integrity Level) as per EN 62061

Can only be used for electrical, electronic or programmable safety solutions.

PL (Performance Level) as per EN ISO 13849-1

is a technology-neutral concept that can be used for electrical, mechanical, pneumatic and hydraulic safety solutions.

Category : refers to the machine itself and achievable PL.

Goes from category B (basic) to category 4 (highest).

Ex: Category 4 allow to reach PL e (highest protection against higher risk)

Type : refers to the specific design of protection equipment like a safety light curtain or relay.

Type 4 device would be most likely to be used in a category 4 application, and a Type 2 light curtain could probably only be used for a category 2 application

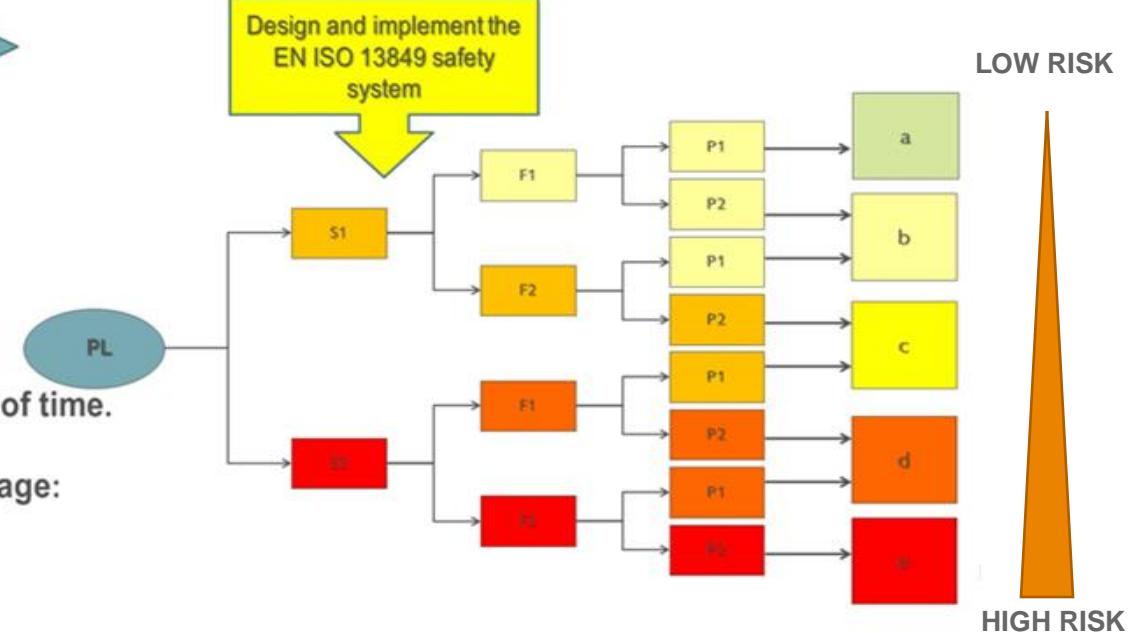

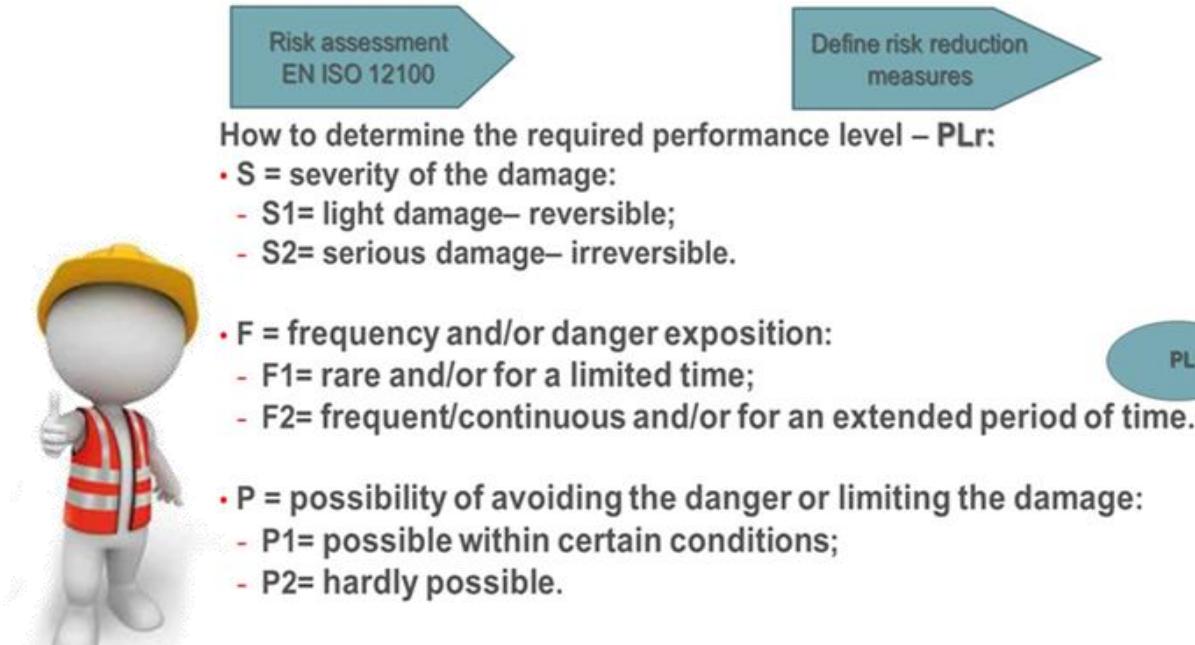

SIL is particularly well-suited to large, complex facilities or factories with multiple machines, while **PL** is suitable for individual machines.

WHAT IS SAFETY?

RISK EVALUATION : PLr (Protection Level required)

Machinery Directive - Overview of the steps to achieve the level of safety required by each application

▼ Objective: risk reduction by applying defined control measures

PLr(e) provides the greatest contribution to risk reduction

SAFETY LIGHT CURTAINS

SLC Range

EVERY CONNECTION COUNTS

Safety Light Curtain : Principle of operation

The SLC uses a combination of an **emitter** and a **receiver**. Multiple **parallel beams** are emitted with various **resolutions** (distance between beams).

If no object or people are blocking the beam between the emitter and receiver, the machine is in a secure state and is allowed to operate.

On the other hand, **if any or all** of the light beams are **blocked by a human finger, hand or body**, the machine determines the situation to be hazardous and **turns off** the output of the receiver to stop the machine.

SLC's are considered as **sensors**

Safety Light Curtain : Advantages

- Effective protection in **the event of fatigue or distraction** of the operator.
- Increase in the productive capacity of the machine as the SLC **does not require** the manual handling of physical guards or waiting for them to open.
- **Faster** machine loading/unloading operations.
- Reduced times of approach to the working areas.
- **Virtually elimination risk of tampering** since any irregular intervention on the light curtain stops the machine.
- **Simple and quick installation**, with greater flexibility of adjustment on the machine, even in the case of subsequent repositioning.
- Possibility **to build up large sized protections**, either **linear** or **along a perimeter**, on several sides, at **greatly reduced costs**.
- Facilitated and fast maintenance of the machine, as there is **no need** to remove physical guards, such as grids, gates, etc.
- Improved appearance and ergonomic effectiveness of the machine.

Main features

SLC4

4 types of detection

6 resolutions :

- 14 mm for finger detection
- 20 mm, 30 mm, 40 mm for hand detection
- 50 mm, 90 mm for detection of the body in a dangerous area

Access control : 2-3-4 beams for body detection

Protected height range 160 mm to 2250 mm

Maximum range:

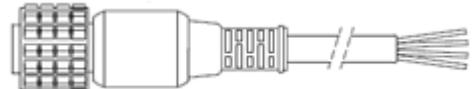

- Selectable 3 m to 6 m for 14 mm resolution models (finger)
- Selectable 4 m to 12 m for other models (hand & body)
- Selectable 10 m to 20 m for L versions

Integrated manual or automatic Start/Restart

Feedback input for external relay monitoring

M12 5/8 poles connectors

Use of unshielded cables up to 100m

SLC4 Type 4 Safety Light Curtain

One simple product range to cover wide range of today's industrial applications

Reliable and compact

High ingress protection ratings

IP67 and IP65 supports protection against dirt, dust, sand, water, projections and other liquids with IP67 and IP65 ratings. High resistance to infiltration by dust and liquids in a highly compact light curtain

Compact size

SLC is one of the smallest light curtains in the market (with integrated safety functions) With a minimal cross section: 28 mm x 30 mm

Robustness

Thanks to powder-coated aluminum casing, SLC range can obtain high level of reliability. Also, highly reliable in cold storage facilities with -30° C to +55° C operating temperature

Safe and Smart

Virtually no blind area

Thanks to the position of the 1st beam on the connector side, this helps protected area to extend until the light curtain end and maintain the resolution

Fast, simple installation

Plug and play thanks to the M12 connectors and the use of unshielded cables. Virtually no programming necessary Easy to install and replace

User-friendly diagnostics via

LEDs Status indicating display that including alignment aids are helping the user to diagnose the status

High level of productivity and safety

High Safety grades

Type 2 and Type 4 SLC light curtains approved in accordance with;

- EN IEC 61496-1/-2
- ANSI / UL 1998

Finger, hand and body protection

From safety light barriers supporting body protection to the light safety light curtain for higher finger and hand protection, the product series SLC4 and SLC4 cover a large portfolio

A range updated to your needs

Integrated safety functions, including self-monitoring of static outputs, control of external contactors (EDM) and selectable automatic/manual restart, supports increased productivity due to reduced downtimes

Reliable and compact

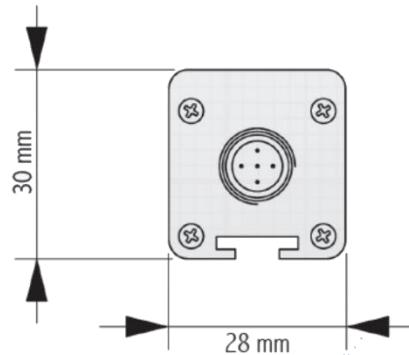

High ingress protection ratings IP67 and IP65

- Helps protect against dirt, dust, sand, water, projections and other liquids
- Resistance to infiltration by dust and liquids in a highly compact light curtain

Compact size

SLC is one of the smallest light curtains in the market (with integrated safety functions) With a minimal cross section: 28 mm x 30 mm

Robustness

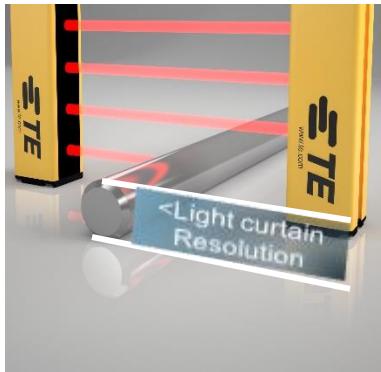

Thanks to powder-coated aluminum casing SLC range can obtain high level of mechanical reliability. Also, highly reliable in cold storage facilities with -30° C to +55° C operating temperature

Safe and Smart

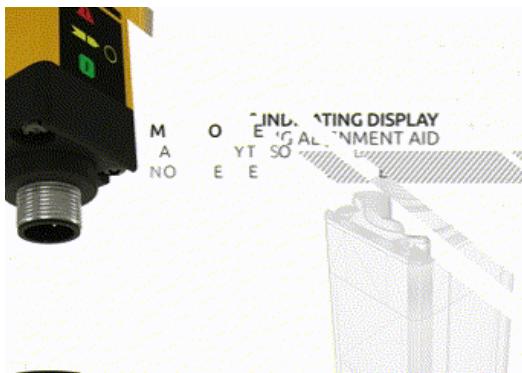

Virtually no blind area

Thanks to the position of the 1st beam on the connector side, this helps protected area to extend until the light curtain end and maintain the resolution.

Fast, simple installation

Plug and play, easy to install & replace thanks to the M12 connectors
Unshielded cables.

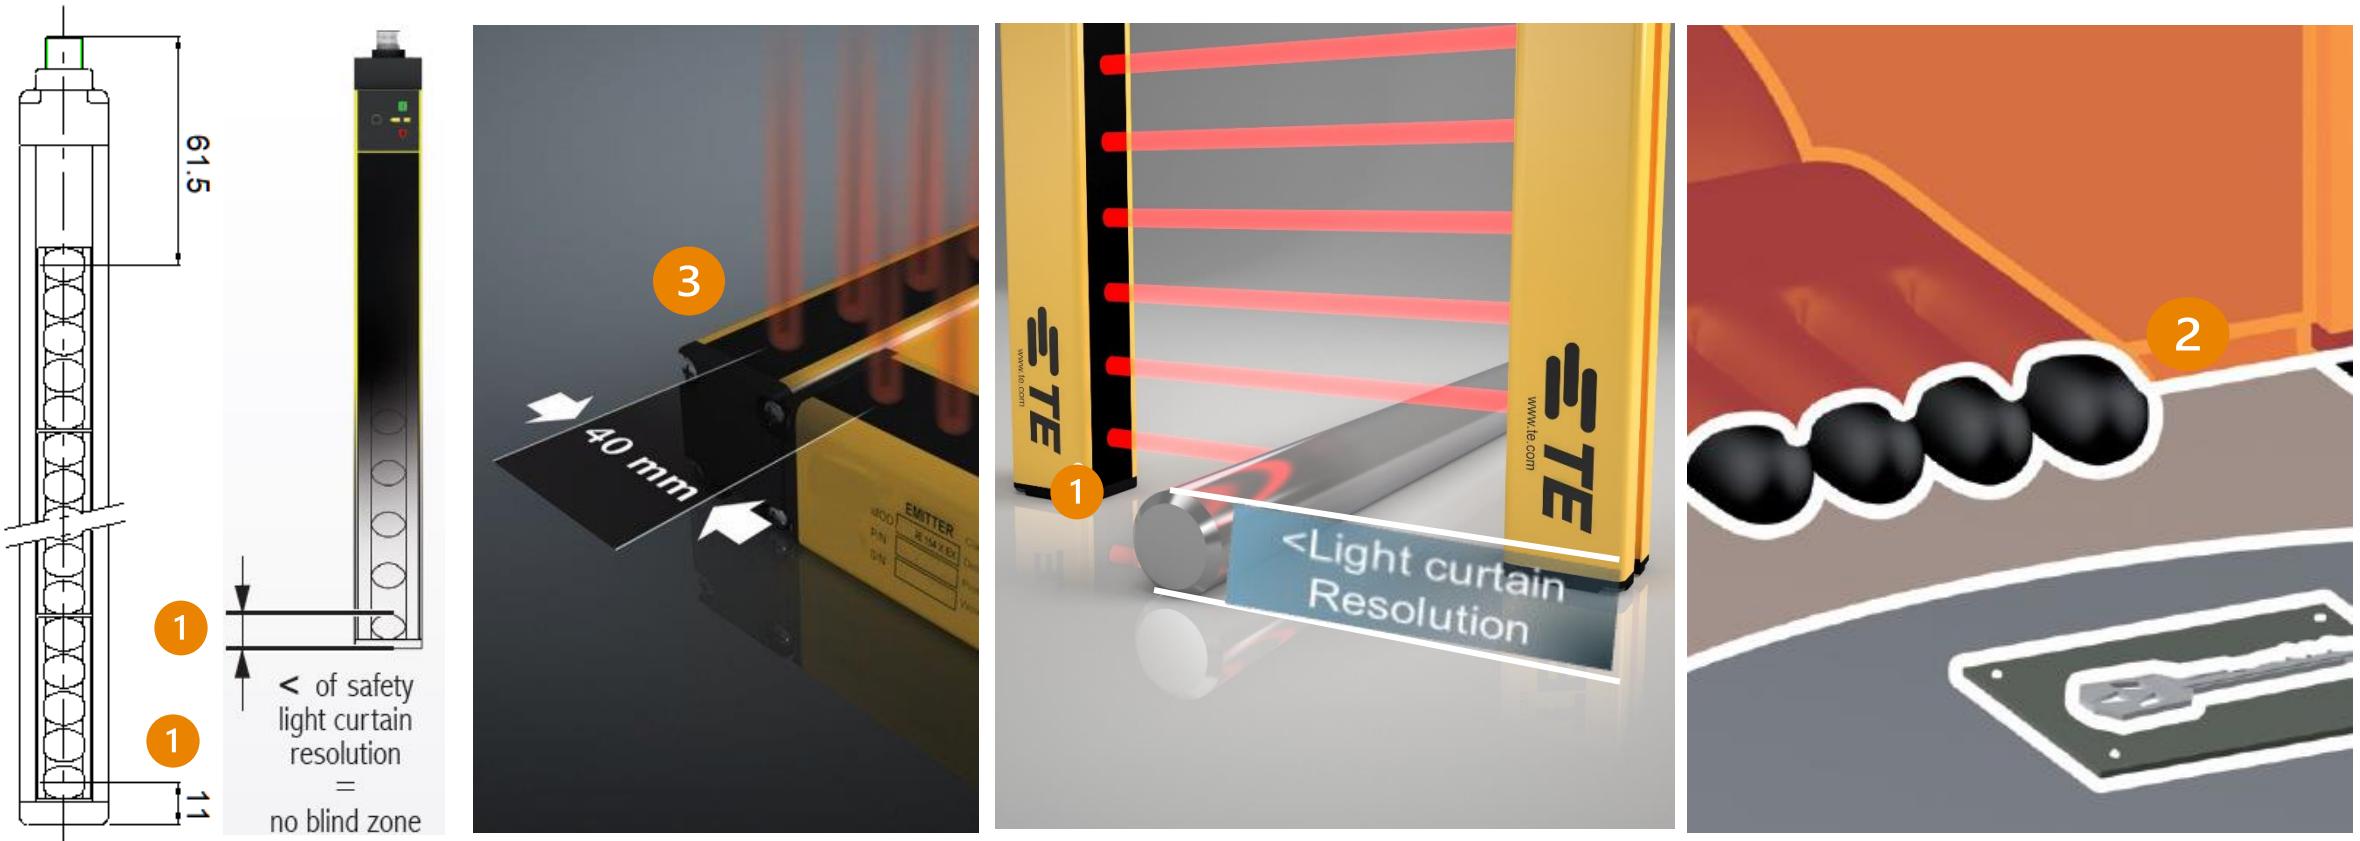

User-friendly diagnostics via LEDs

Status indicating display that including alignment aids are helping the user to diagnose the status

Safe and Smart : Virtually no blind area on one side

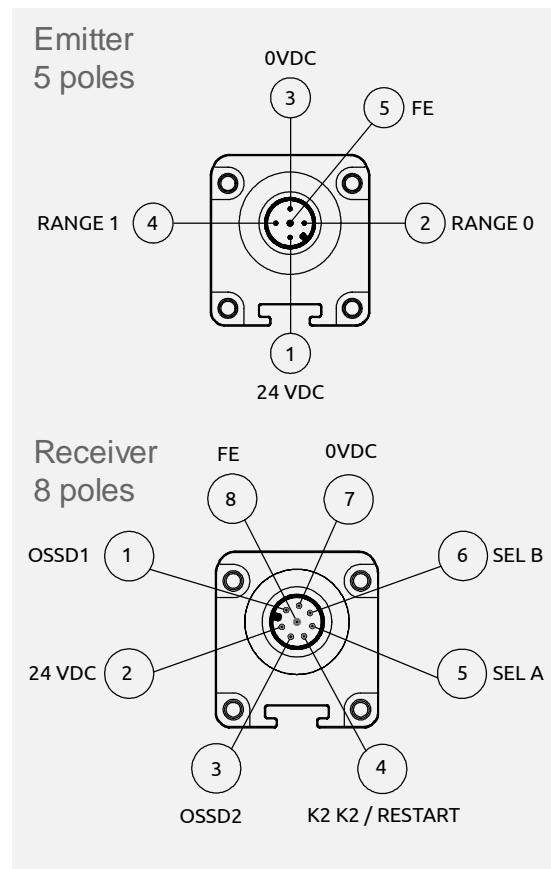

- 1 Thanks to the position of the 1st beam, The protected area extends until the light curtain end maintaining the finest resolution up to (14 mm)
- 2 Fingers and hands are always detected and protected on the entire height
- 3 2 L-mounted light curtains maintain 40 mm resolution (hand detection) in corner (models with resolution 30 mm and 40 mm)

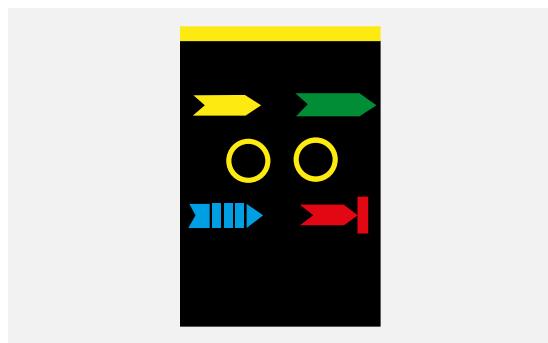

User interface

Pin-out and display information

Pin-out (X/XH models)

Display information

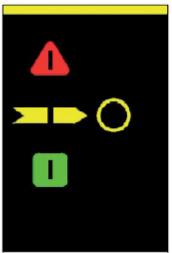

On the receivers of 14 mm resolution and H models a blue LED indicates a weak signal intensity.

During alignment operations, checking the blue LED status can be helpful. During standard operation it must remain off.

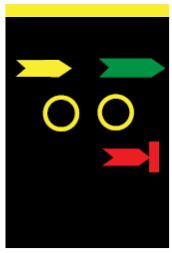

Emitter - All models

Three colour LED	Meaning
Red	System power-on - Initial TEST
Green 2 blinks	System power-on - HIGH working range selected
Red blinking	FAIL condition - The type of fault is identified by the number of flashes - See technical manual
Brown	TEST condition
Green	Normal operating condition

Receiver - All models except SLC4 14 mm and L (range 20 m) versions

1 - Yellow LED	2 - Two colour LED	Meaning
Yellow	Red	System power-on - Initial TEST
White	Red	BREAK condition
Yellow	White	CLEAR condition - SLC4 (with integrated control functions) only
Yellow blinking	Red blinking	BREAK_K condition - SLC4 (with integrated control functions) only
White	Green	GUARD condition
White	Red blinking	FAIL condition - The type of fault is identified by the number of flashes - See technical manual

SAFETY RELAYS

SRS-SRK Range

EVERY CONNECTION COUNTS

Safety Relays

...for barriers with automatic start/restart (SLC series)

SRS safety relays

The Safety Relays are a dedicated interface between safety light curtains, equipped with self-controlled safety static outputs, and control circuits of the machine or plant

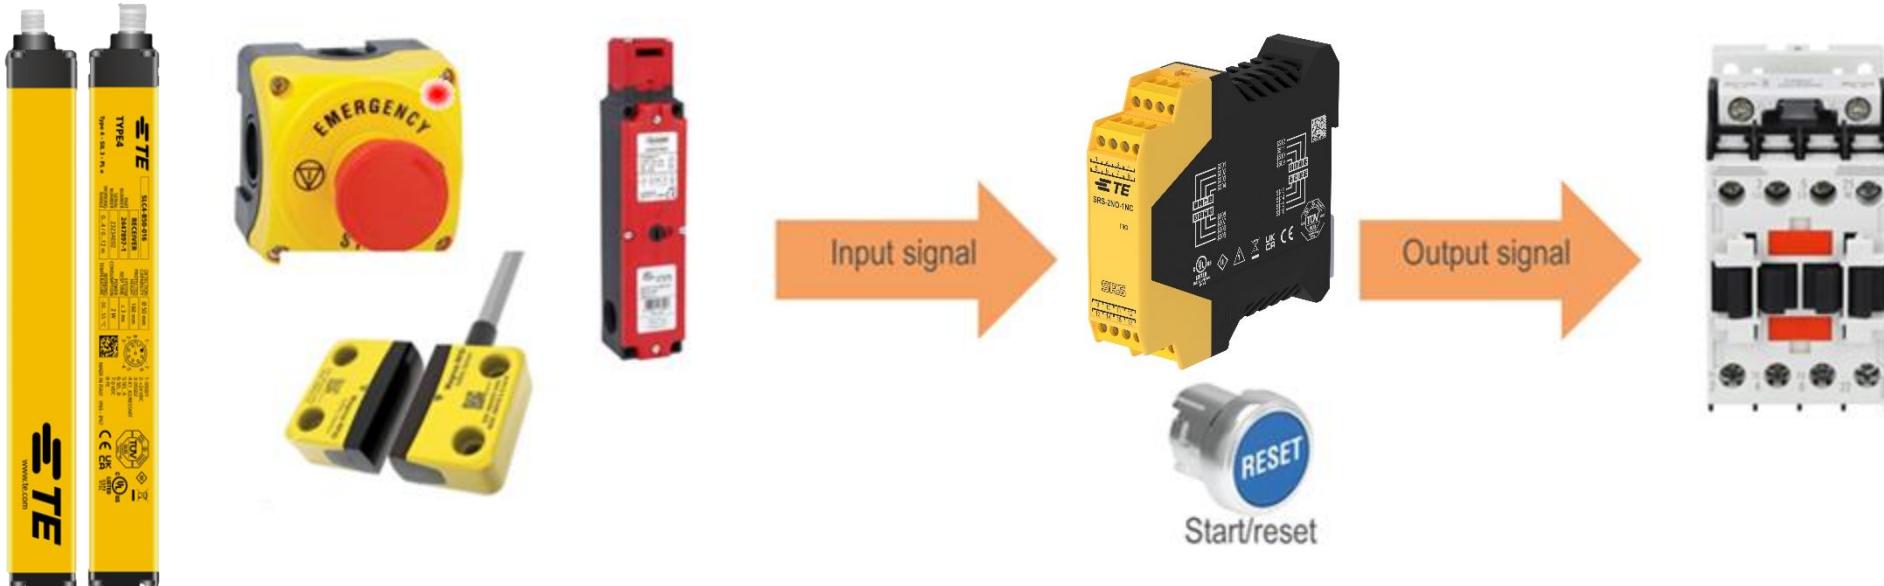

- SRS-2NO-1NC → Safety interface for devices with integrated feedback input for EDM (with auxiliary contact). 2 NO + 1 NC. Screw Terminal Blocks
- SRS-2NO → Safety interface for devices with integrated feedback input for EDM. 2 NO. Screw Terminal Blocks

- SRS4-2NO → Safety interface for OSSD output devices. 2 NO. Screw Terminal Blocks
- SRS4M-2NO → Safety interface with integrated Muting functions for OSSD output devices. 2 NO. Screw Terminal Blocks
- SRS MULTI → Multifunction Safety Relay, Screw Terminal Block

(Safety Light Curtains, Solid-State-Output Devices (i.e. RFID safety switches), Dual-Channel Emergency Stops, Two-Hand Controls and Safety, Photocells)

How is it functioning?

Safety relays are devices used to control the safety-related part of control systems in such a way that machine operation is only allowed when safety is confirmed. It supports safety by controlling signals coming from inputs, especially emergency stop switches and locking switches and controls the contactors and other devices connected to the outputs according to the results of this detection. In other words, the safety relay module and safety controller play a central role as the logic unit in the safety-related part of the control system.

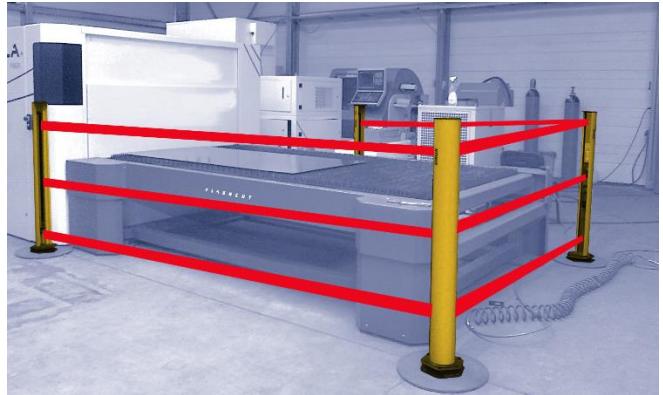

Typical applications

- Robotics
- Food & beverage
- Packaging
- Pharmaceuticals
- Paper
- Logistics
- Metalworking
- Woodworking
- Chemicals
- Injection moulding
- Printing

AFG- Robotics, Machinery, Control cabinet

Safety area with light curtains and mirrors

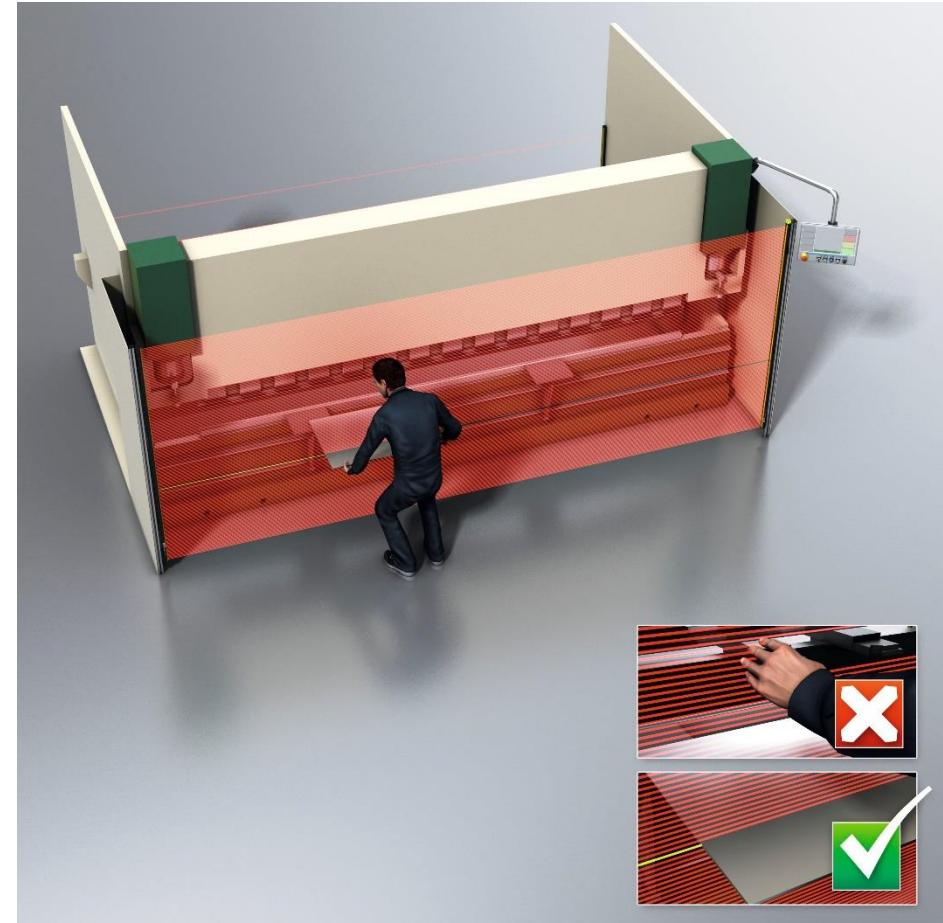

Safety area with light curtains for machinery

Safety systems for robots

Safe Robotics Area supports protection, safer access to cooperative robot applications for less downtime, enhanced work processes and higher productivity.
